2360 LED Flashlight

THE BRIGHTEST 2AA POWERED LED FLASHLIGHT ON THE MARKET

If you like the convenience of AA alkaline batteries, but need the performance of lithium batteries, the new 2360 LED is the light for you. Using 2 standard AA alkaline batteries, the new 2360 LED emits a peak output of 95 lumens with a run time of up to 2 hours. Because when you are on the job, the last thing you need to worry about is a dim flashlight or dead batteries. Constructed with the most durable of materials: an aerospace grade aluminum body and an impact resistant LED lamp module, the 2360 LED keeps you on point without equipment failure. The non-slip textured body and push button tail switch are easy to operate in slippery conditions. The removable two way pocket clip securely attaches the 2360 to your pocket or the brim of your hat.

The 2360: efficiency redefined.
