LIGHTS 7060 LED

7060 LED Flashlight

In a rare collaboration between public and private sectors, the City of Los Angeles Police Department™ (LAPD) has partnered with Pelican Products to develop the Pelican 7060 LED as the standard issue tactical/patrol flashlight for all its officers.

The Pelican 7060 LED light employs new dual switch technology that allows the light to be activated by either a body-mounted patrol switch or a tail-mounted tactical switch. The dual switches, which include a momentary mode, allows the user to grip the light in several positions and still control activation. The light incorporates rechargeable Lithium-Ion batteries for maximum brightness and are also light weight compared to standard batteries.
